ASTROLOGY

Get Rich (not quick)

Money makes the world go round, right? Sure, we all want love, but we want money too! If you want to make as much as you can but aren't sure how, you can use your chart to help you figure out what are the best ways for you to maximize your earning potential in this life and grab all the dough you can!

Before you begin, you will need to know a few placements from your natal chart. They are:

2nd house sign, planets, and ruler

Venus sign, house, and aspects

Jupiter sign, house, and aspects

Asteroid Abundantia sign, house, and aspects

Do you need to create your natal chart?

Watch the video on the [Free Astrology Courses](#) page for instructions on how to do so via astro.com, and how to figure out the placements in your chart.

FIRST: 2ND HOUSE OF MONEY

The 2nd house rules your income, so it specifically governs how you make money, and your approach with money. First, look to see what sign is on the cusp of your 2nd house (the cusp of a house is the very beginning of that house). The sign on the cusp is the most important part of your 2nd house, and if you pay attention to nothing else covered in this mini course, pay attention to this sign. Next, you'll look at any planets that are in your 2nd house. Any planets in the 2nd house will impact your 2nd house, and will offer more ways for you to make money. Check out the [2nd House](#) page on The Dark Pixie Astrology for interpretations of the 12 signs on the cusp and natal planets in the house.

But I don't have any planets in the 2nd house!

Having no planets in your 2nd house does NOT mean you'll never make any money in your life and be destined to have financial problems. When a house has no planets in it, all that means is that you carry less baggage into this life to work out regarding the areas of life that house rules. So no need to panic!

Here are some potential ways you can make money via the signs on the 2nd house cusp (for planets in the 2nd house, look at the sign ruling that planet):

Aries - soldier, police officer, firefighter, optometrist, arson investigator, physical therapist, athlete, personal trainer, in sports, on your own

Taurus - artist, musician, gallery owner, music manager, talent scout, chef, baker, taste testers, farmer, banker, investor, appraiser, singer, surveyor

Gemini - salesperson, coordinator, publicist, advertiser, producer, linguist, statistician, accountant, writer, editor, publisher, literary agent, in IT

Cancer - executive, gardener, teacher, social worker, soldier, librarian, caretaker, home builder, interior designer, construction

Leo - artist, director, cardiologist, politician, publicist, news anchor, actor, athlete, musician, in theater, comedian

Virgo - critic, librarian, psychologist, secretary, analyst, psychologist, mathematician, statistician, accountant, economist, editor

Libra - actor, jeweler, diplomat, florist, makeup artist, lawyer, musician, fashion designer, interior designer, art director, curator, mediator, judge

Scorpio - detective, profiler, cryptographer, investigator, antiques dealer, researcher, forensic accountant, forensic pathologist, medical examiner, psychologist, entrepreneur

Sagittarius - philosopher, athlete, lawyer, theologian, engineer, pilot, entrepreneur, salesman, teacher, writer, speaker, publisher, in television or radio

Capricorn - carpenter, dentist, orthopedist, civil engineer, chiropractor, mason, CEO, politician, government official, historian, antiques dealer, doctor

Aquarius - astronaut, astrologer, electrical engineer, psychologist, teacher, politician, inventor, entrepreneur, scientist, researcher, physicist, civic leader, in IT or online

Pisces - podiatrist, bartender, chemist, artist, veterinarian, chemical engineer, psychic, spiritualist, healer, writer, musician, boat captain, dancer, doctor, nurse

Once you've got those, then you'll want to find the ruler of the 2nd house. Every sign has a planetary ruler of that sign. They are:

Aries - Mars

Taurus, Libra - Venus

Gemini, Virgo - Mercury

Cancer - Moon

Leo - Sun

Scorpio - Pluto

Sagittarius - Jupiter

Capricorn - Saturn

Aquarius - Uranus

Pisces - Neptune

The planetary ruler of a house is the planetary ruler of the sign on the house cusp, so whatever sign is on your 2nd house cusp, the ruler of that sign is the ruler of your 2nd house. The house that planet is in can give a little more information about your 2nd house, with the house the ruler is in being linked to the 2nd house in some way.

Planetary ruler of the 2nd house in the houses:

1st house - making money is important for you, and you should take chances and not be afraid of starting new things and putting yourself out there, as a leader, in the military

2nd house - the ruler of the house in the house gives a natural ease with the energy of that house

3rd house - you can make money through writing, speaking, using your mind, learning, dealing with young people, communities, neighbors, or siblings, using technology

4th house - making money makes you feel secure, and you can make money through the home or family, or through nurturing

5th house - you can make money through a hobby or sport, through being creative, dealing with children, love, or through the theater

6th house - you can make money through working for someone else, when you pay attention to the details, are organized, and structured, or dealing with health or pets

7th house - you can make money with a partner, dealing with relationships, weddings, marriage, making compromises

8th house - you can make money in a way that's beneficial to both you and other people, through transforming something, or through sexuality

9th house - you can make money through travel, dealing with foreigners, doing something international, public relations, higher education, or the law

10th house - you can make money with the help of a boss, parent, mentor, or elders, and after a lot of hard work and determination, in politics, government

11th house - you can make money through or in a group, with friends, online, inventing new things, being innovative, futuristic, unconventional

12th house - you can make money focusing on spirituality, dreams, the subconscious mind, the past, baggage, karma, or dealing with anything hidden like secrets

Another thing to look at is if your 2nd house cusp is at certain degrees called critical degrees. In each sign, there are 30 degrees (and in each degree, there are 60 minutes). The critical degrees are specific degrees that can mean you have more to work through, and with the 2nd house, this means you'll have to work on having a better relationship with your finances. The critical degrees are:

0, 13, and 26 of Aries, Cancer, Libra, Capricorn

8-9, 21-22 of Taurus, Leo, Scorpio, Aquarius

4 and 17 of Gemini, Virgo, Sagittarius, Pisces

There is one more critical degree, the anaretic degree, which is 29 degrees of any sign. Having your 2nd house at the anaretic degree can show that you struggle to manage your finances properly, have difficulty figuring out the best way to make more money, or always feel like you never have enough. When you develop a healthy attitude toward

money, learn how to be responsible without being a cheap miser, and find a way to make money that you're not doing just for money but for love as well, you'll thrive.

SECOND: VENUS

Most of you know Venus is the planet of love, but did you also know that Venus rules money as well? Miss Venus is the natural ruler of the 2nd house of money, and has some sway over your finances. Determine the sign Venus is in and house Venus is located. Visit the [Natal Venus](#) page of The Dark Pixie Astrology for interpretations of Venus in the 12 signs and 12 houses (and see the keywords in the first section for the signs which can also be used for Venus).

Next, determine the major aspects that your Venus makes to your other planets. An aspect is when two points in a chart are at certain angles to one another. If you don't know the aspects your Venus makes, create your chart on astro.com as described in the video, and when you've generated the chart, click on Additional tables (PDF) on the upper left. This will generate a PDF of your chart with an Aspects table on the bottom.

Find the Venus symbol: ♀

Follow the column and row for Venus and see if any of them are filled out. Ones that are empty show no major aspects exist between Venus and the other planet. These are the glyphs for the other planets:

Sun ☉

Moon ☾

Mercury ☿

Mars ♂

Jupiter ♃

Saturn ♄

Uranus ♅

Neptune ♆

Pluto ♇

This table does show some minor aspects. For the sake of this mini course, you can just focus on the major aspects, which are:

Conjunction ☌

Sextile ✎

Square ☐

Trine △

Opposition ☌

The minor aspects that astro.com shows are (if you're a beginner, just focus on the major ones first and get a good handle on those):

Semisextile ♁

Quincunx ⚡

Quintile Ⓚ

BiQuintile **Ⓚ**

Semisquare ☾

Sesquiquadrate ☐

Look at the row and column for your Venus, and see which major aspects are present with other planets. Your Venus likely won't make more than a handful of major aspects (even less than that for some of you). This is the case for all planets, so if you don't have more than a couple of major aspects to your Venus, don't be alarmed. The major aspects will just have more influence over your Venus.

Sextiles and trines are seen as positive, so you have an easier time manifesting the energy of the two planets together in a positive way. Squares and oppositions are seen as difficult, so you have a harder time manifesting the energy of the two planets in a positive way. That doesn't mean that if you have only squares and oppositions to your Venus for major aspects that you'll always struggle financially and never have any money, but it does mean you have more to work on. Squares tend to be more internal, so if you see a square, you know it's something you need to work on with yourself on the inside. Oppositions tend to be external, so if you see an opposition, you know that you have to learn how to manage dealing with other people and oppositional energy.

Conjunctions can go either way as neutral aspects. In the natal chart, the planet conjunct your Venus is most important for Venus, and can impact the ways in which you can make money. For interpretations of all major

aspects to your natal Venus, visit the [Natal Venus](#) page of The Dark Pixie Astrology.

Like with the 2nd house, you'll also want to see if your Venus is at a critical or anaretic degree, and if it is, it'll be interpreted similarly to the 2nd house.

THIRD: JUPITER

Jupiter is the planet of abundance and expansion, so if you want a lot of money, you want to look at your Jupiter, as he will show how you can create abundance in your life. Determine the sign Jupiter is in and house Jupiter is located first. Visit the [Natal Jupiter](#) page of The Dark Pixie Astrology for interpretations of Jupiter in the 12 signs and 12 houses.

Next, determine the major aspects that your Jupiter makes to your other planets, just like you did with Venus. Focus on major aspects, knowing that squares and oppositions can show where you'll need to put in some effort, sextiles and trines show where you'll have an easier time, and conjunctions have the biggest influence over your Jupiter. For interpretations of all major aspects to your natal Jupiter, visit the [Natal Jupiter](#) page of The Dark Pixie Astrology.

Pay special attention to the aspect between Jupiter and your Sun and your Venus, if it makes one. A major aspect with Jupiter/Sun or Jupiter/Venus shows that it's important for you to have abundance in your life, and even with the squares and oppositions, is easier for you to attain than for others.

A conjunction between Jupiter and Saturn is likely the one that makes it most difficult to gain abundance in your life, however it's not impossible. It just means you won't have it without putting in an enormous amount of

hard work, being responsible, or being realistic, and that it can come later in life.

Like with Venus and the 2nd house, also see if your Jupiter is at a critical or anaretic degree. If it is, you can have difficulty creating or managing abundance in your life, and need to work on embracing the abundance you already have and create a positive attitude toward abundance.

FOURTH: ASTEROID ABUNDANTIA

There actually is an asteroid named Abundantia, which rules, of course, abundance! It will be interpreted similarly to Jupiter, the planet of abundance, in terms of sign, house, and aspects. You can find your asteroid Abundantia on astro.com by going to Extended Chart Selection and under the Additional Objects section where the text box is, type in 151 (the number for asteroid Abundantia), and then generate the chart.

If you're feeling a little more daring, you can not only look at Abundantia in your natal chart, but also track transit (moving) Abundantia as well. The movement of transit Abundantia through your houses can show where you can find abundance right at this moment, and the aspects transit Abundantia makes can show how difficult or easier it is and where or how to focus the abundant energy.

You can create an asteroid ephemeris on astro.com by going to Extended Chart Selection, clicking on Ephemeris for the Methods section near the top, and type 151 in the text box in the Ephemerides for Other Objects section; for the Start Date section, put the year that you want the ephemeris to be for.

Also note when transit planets will trigger your natal asteroid Abundantia. Transit Uranus conjunction? Sudden abundance that's unexpected. Transit Jupiter trine? Abundance times two. Transit Mars

opposite? Opposition preventing abundance. Best times will likely be when the transit Sun, Venus, Mars, or Jupiter conjunct your Abundantia.

This is taken from a blog article covering the impact of transit

Abundantia aspects:

Conjunctions by transit asteroid Abundantia to your natal planets and angles can bring out abundant energy with the areas of life involved.

To the **Sun, Moon, 1st house ruler, or angles, you can feel abundant overall**, and have an easier time pursuing opportunities for abundance and doing things like manifesting.

To **Mercury**, you may have an abundance of ideas and mental energy; to **Venus**, you may have an abundance of people to deal with and sensual energy; to **Mars**, you can experience an abundance of energy that can be helpful for anything you pursue, but you may have to make sure you have a positive outlet, otherwise you can be easily irritated, to **Jupiter**, you can experience an abundance of opportunities for you to pursue, and extra expansion in your life; to **Saturn**, you may have an abundance of goals to focus on and responsibilities to handle; to **Uranus**, you may have an abundance of changes to work on and dreams to pursue; to **Neptune**, you may have an abundance of spiritual energy and intuition; to **Pluto**, you may have an abundance of power and control; to **Chiron**, you may have an abundance of healing work to do; to **Black Moon Lilith**, you may have an abundance of empowerment and speak out; to **White**

Moon Selena, you may have an abundance of protection and feel guided on your path; to the **North Node**, you may have an abundance of energy to focus on your potential and purpose if you can push through the discomfort; and to the **South Node**, you may have an abundance of comfort and familiarity but may fall back on bad habits you shouldn't.

Sextiles and trines by transit asteroid Abundantia to your natal planets and angles can make it easier to manage abundance without feeling like it's too much. To the Sun, Moon, 1st house ruler, or angles, you can work to create abundance in your life on your own terms, and feel you have it under your control.

To Mercury, you can control an abundance of ideas and focus on the important ones; to Venus, you can manage your relationships and feel physically connected to the world; to Mars, you can control your abundance of energy and drive to make things happen; to Jupiter, you can pursue opportunities for abundance with motivation; to Saturn, you can balance responsibilities and the goals you want to work on; to Uranus, you can get control of change in your life; to Neptune, you can control spiritual energy without getting lost in the fog; to Pluto, you can control your passionate energy; to Chiron, you can control your healing energy; to Black Moon Lilith, you can control your inner power; and to White Moon Selena, you can control how you get on your path.

Squares and oppositions by transit asteroid Abundantia to your natal planets and angles can make it more difficult to manage abundance, and it may feel like it's out of control at times, or it may feel like there's just not enough. To the Sun, Moon, 1st house ruler, or angles, you can feel this more personally, and you may have to work harder to find abundance in your life. Try not to let it get you down.

To **Mercury**, you may struggle with mental abundance, and have too many ideas or not enough; to **Venus**, you may struggle with people in your life, and have too many relationship issues to deal with or not enough people to connect with; to **Mars**, you may struggle with an abundance of energy, and have too much that requires an outlet or not enough to pursue anything; to **Jupiter**, you may struggle with an abundance of opportunity, and may have too many opportunities to sort through or not enough; to **Saturn**, you may struggle with an abundance of responsibilities, and this can feel stifling to you; to **Uranus**, you may struggle with an abundance of erratic energy, and this can require flexibility; to **Neptune**, you may struggle with too much foginess clouding your judgment and need better boundaries; to **Pluto**, you may struggle with too many fights over power and control; to **Chiron**, you may struggle with old wounds reopening; to **Black Moon Lilith**, you may struggle with managing the desire to speak up with impulsiveness; to **White Moon Selena**, you may struggle with finding your path and feeling safe; and square the **Lunar Nodes**, you may struggle with the

blocks that have been keeping you from your path and they can become bigger issues until dealt with.

Answer the questions below.

Do you want to make more money?

If no, feel free to stop now!

If yes -

How are you making money now?

Are you happy with the way you make money now?

If yes -

How can you incorporate what you've learned about your chart into how you currently make money? List ideas.

If no -

How would you like to make money? Does it fit what your chart says?

If not, how can you tweak it to fit? List ideas.

Tip: If what you do or want to do isn't listed in this mini course, do a search online to find out the sign, house, and planetary rulers for it.

If you don't know how you'd like to make money, make a long list of ways in which your chart says you can. Cross off anything that doesn't

interest you at all. Then live with the list for a little while, and slowly cross off more, add news ones you find, or tweak ones that are on there, until you've narrowed it down.
