

# THE PERFECT HOME

The Dark Pixie  
ASTROLOGY

## The Perfect Home

We all have an idea in our heads of what we'd like our perfect house to look like, or perfect home life to be like. You can actually find your ideal home and home life from your chart and try to manifest that in your life.

Before you begin, you will need to know a few placements from your natal chart. They are:

4th house sign, planets, and ruler

Moon sign, house, and aspects

House with Cancer on the cusp

*Do you need to create your natal chart?*

Watch the video on the [Free Astrology Courses](#) page for instructions on how to do so via astro.com, and how to figure out the placements in your chart.

## FIRST: 4TH HOUSE OF HOME

The 4th house rules your home and home life. From studying your 4th house, you can find what type of home you want (literally), and what type of home environment you want.

First, look to see what sign is on the cusp of your 4th house (the cusp of a house is the very beginning of that house). The sign on the cusp is the most important part of your 4th house, and if you pay attention to nothing else covered in this mini course, pay attention to this sign.

Next, you'll look at any planets that are in your 4th house. Any planets in the 4th house will impact your 4th house, and will offer more ways for you to become famous. Check out the [4th House](#) page on The Dark Pixie Astrology for interpretations of the 12 signs on the cusp and natal planets in the house.

*But I don't have any planets in the 4th house!*

Having no planets in your 4th house does NOT mean you can't create the kind of home and home life that you want. It simply means you don't have as much baggage to work on going into this life with this area of life. A good thing!

Once you've got those, then you'll want to find the ruler of the 4th house. Every sign has a planetary ruler of that sign. They are:

Aries - Mars

Taurus, Libra - Venus

Gemini, Virgo - Mercury

Cancer - Moon

Leo - Sun

Scorpio - Pluto

Sagittarius - Jupiter

Capricorn - Saturn

Aquarius - Uranus

Pisces - Neptune

The planetary ruler of a house is the planetary ruler of the sign on the house cusp, so whatever sign is on your 4th house cusp, the ruler of that sign is the ruler of your 4th house. The house that planet is in can give a little more information about your 4th house, with the house the ruler is in being linked to the 4th house in some way.

Planetary ruler of the 4th house in the houses:

1st house - your home and home life are vital to you feeling like yourself, and can be a top priority; you may want to be the head of the house, or enjoy living alone

2nd house - financial stability can be important for you to have the home life you want, and you can want a home full of beautiful items of value

3rd house - having a home life that stimulates you mentally is important for you, and you can move a lot throughout your life, needing variety

4th house - the ruler of the house in the house gives a natural ease with the energy of that house

5th house - children can be the focal point of your home life, can prefer larger spaces, and you want a home that is colorful, fun, or bright

6th house - you want a place for everything in your home, can prefer smaller spaces, and to keep it as clean as you can; good for working from home

7th house - you prefer living with someone instead of alone, may want to live in cities instead of small towns, and want your home life to be as harmonious as possible

8th house - you may want to transform old homes or have a old transformed pieces in your home, and may want control over your home life

9th house - you prefer larger spaces, can live far from where you were born, and don't want to feel tied down, needing freedom to roam

10th house - you can be the matriarch/patriarch with your home life, and want a home that displays status but isn't gaudy

11th house - you can live with friends and have many roommates throughout your life, and like unusual spaces or living arrangements

12th house - you need a space in your own that's just for you to get lost in, and prefer living by the water

Another thing to look at is if your 4th house cusp is at certain degrees called critical degrees. In each sign, there are 30 degrees (and in each degree, there are 60 minutes). The critical degrees are specific degrees

that can mean you have more to work through, and with the 4th house, this means you'll have to work harder and have more blocks to get through in order to create the perfect home and home life for you. The critical degrees are:

0, 13, and 26 of Aries, Cancer, Libra, Capricorn

8-9, 21-22 of Taurus, Leo, Scorpio, Aquarius

4 and 17 of Gemini, Virgo, Sagittarius, Pisces

There is one more critical degree, the anaretic degree, which is 29 degrees of any sign. Having your 4th house at the anaretic degree can show that you struggle with being in the home or having the home environment that you want, and have to work harder at dealing with the blocks that are in your way.

## SECOND: THE MOON

The Moon is the natural ruler of the 4th house, and adds to what you want your home and home life to be. Determine the sign the Moon is in and house the Moon is located. Visit [The Natal Moon](#) page of The Dark Pixie Astrology for interpretations of the Moon in the 12 signs and 12 houses.

Next, determine the major aspects that your Moon makes to your other planets. An aspect is when two points in a chart are at certain angles to one another. If you don't know the aspects your Moon makes, create your chart on astro.com as described in the video, and when you've generated the chart, click on Additional tables (PDF) on the upper left. This will generate a PDF of your chart with an Aspects table on the bottom. Find the Moon symbol: ☾

Follow the column and row for the Moon and see if any of them are filled out. Ones that are empty show no major aspects exist between the Moon and the other planet. These are the glyphs for the other planets:

Sun ☉

Mercury ☿

Venus ♀

Mars ♂

Jupiter ♃

Saturn ♄

Uranus ♅

Neptune ♆

Pluto ♇

This table does show some minor aspects. For the sake of this mini course, you can just focus on the major aspects, which are:

Conjunction ☌

Sextile ✎

Square ☐

Trine △

Opposition ☍

The minor aspects that astro.com shows are (if you're a beginner, just focus on the major ones first and get a good handle on those):

Semisextile ♁

Quincunx ⚡

Quintile ♐

BiQuintile **♐**

Semisquare ⚡

Sesquiquadrate ☐

Look at the row and column for your Moon, and see which major aspects are present with other planets. Your Moon likely won't make more than a handful of major aspects (even less than that for some of you). This is the case for all planets, so if you don't have more than a couple of major aspects to your Moon, don't be alarmed. The major aspects will just have more influence over your Moon.

Sextiles and trines are seen as positive, so you have an easier time manifesting the energy of the two planets together in a positive way. Squares and oppositions are seen as difficult, so you have a harder time manifesting the energy of the two planets in a positive way. That doesn't mean that if you have only squares and oppositions to your Moon for major aspects that you'll never be able to have a good home and home life, but you will have to work harder. Squares tend to be more internal, so if you see a square, you know it's something you need to work on with yourself on the inside. Oppositions tend to be external, so if you see an opposition, you know that you have to learn how to manage dealing with other people and oppositional energy.

Conjunctions can go either way as neutral aspects. In the natal chart, the planets conjunct your Moon is most important for Moon, and can impact what kind of home and home life you want. For interpretations of all major aspects to your natal Moon, visit [The Natal Moon](#) page of The Dark Pixie Astrology.

Like with the 4th house, you'll also want to see if your Moon is at a critical or anaretic degree, and if it is, it'll be interpreted similarly to the 4th house when it comes to your home/home life.

## THIRD: CANCER HOUSE

Cancer is the sign that the Moon rules, and the house cusp that Cancer falls on can show where you can feel at home, so look for the house cusp that has the sign of Cancer on it: 🌙

It'll be interpreted similarly to the signs on the 4th house cusp, except it'll be assigned by house instead. These are the interpretations from The Dark Pixie Astrology for the Cancer houses:

### **1st House in Cancer (Cancer Rising)**

You come across as someone who is nurturing, sensitive, and shy. You can seem quite emotional publicly, but you try to keep your feelings to yourself. You interpret situations and get a sense of new people through your emotions. You can pick up the emotions coursing through any situation, and can understand what people are feeling. This makes you seem like you're psychic, and you should listen to your instincts because they process what you may not see with your eyes. People look to you to be the comforter, the nurturer, the protective one, the mother. You take care of those around you, and are seen as the mother hen.

### **2nd House in Cancer**

You can keep your money, save and invest wisely, and don't want to spend too much on anything except your home or family. You could spoil your family but be cheap with everything else. Having financial

security means a lot to you, and you feel emotionally uneasy when your finances aren't in order. How much you make can ebb and flow, changing through your life constantly. You can make money through something Cancer-related, like through the public, nurturing others, in or for the home, or with or for family.

### **3rd House in Cancer**

Once you commit something to memory, you'll never forget it. You have one of the longest memories out there, especially when it comes to anything that impacts you emotionally. You never forget the emotions you felt and that coursed through others in any given situation. While this makes you understanding, it can also make it hard for you to be objective. Learning may have been difficult for you as a child, and it makes you sensitive when it comes to learning as an adult. If you have siblings, they likely played an important role in your childhood.

### **4th House in Cancer**

You feel protective of your family, and need some roots. Your family is important to you, and you absorb much of your home environment into your personality. You like to maintain family traditions, and you try to maintain your relationships with your family members no matter what. As you get older, you need a place to call home, to put down roots and settle down.

### **5th House in Cancer**

You're not one for light-hearted affairs, and prefer hobbies that are comfortable, comforting, or domestic, like cooking or knitting. You can have a secret creative side to you though, and can find it easier to express yourself through creative ventures. In love, you're quite emotional, and need to learn how to manage that before you have a healthy relationship. You're protective of your children, and nurture and support them.

### **6th House in Cancer**

You work well when you're helping other people, and can be emotional with your work. You may care more about your work than any other area of your life. If you don't have stable work, it has a physical impact on you. Watch for stomach or breast issues. You're caring with your coworkers, and not dominating as a boss. You can work from home with Cancer here, or do work that helps families or with your own family.

### **7th House in Cancer**

You want a partner who is sensitive and nurturing. You're emotional with a partner, and need someone who will be sensitive and understanding of your feelings. Conversely, you can prefer a partner who's emotional, and you need to be the one there for them. In a relationship, you want loyalty, and emotions run high. The relationship ebbs and flows, but you grow closer over time.

### **8th House in Cancer**

You prefer to go the traditional route when it comes to joint finances and investing, and don't want to take any chances. You can spend a lot of time dwelling on your emotions, but not be open with your needs. Your emotions drive you to transform in life, as well as your home and family.

### **9th House in Cancer**

Your emotions influence your beliefs, and you go with what your feelings tell you. You like to do work for other people. You prefer going away from where you grew up, and find you're comfortable in foreign places and know how to adapt to various cultures.

### **10th House in Cancer**

You care deeply about your career and success, and because of that, can experience some upheaval and fluctuations until you finally devote yourself to something. You want to be seen as someone who knows what they're doing and can be looked up to. You can be quite ambitious, creative, and helpful to others once you do pick a career. You can have a career that's Cancer-related, like dealing with the public, nurturing others, in or for the home, or with or for family.

### **11th House in Cancer**

You prefer having your friends over to your house, and love a small dinner party. You have a small group of close friends that are like family to you. Your dreams may include doing something to help people who are in need.

## **12th House in Cancer**

You keep your emotions to yourself, not wanting anyone to see just how emotional you are. You come across as fun and free, but when comfortable, you can show how sensitive you are. You need to work on being more sensitive to other people.

*What if I have Cancer on two house cusps?*

Some of you may see Cancer on two house cusps, which gives you double the possibilities for fame. Note that the first house cusp with Cancer on it might actually be taken over by your desire for a home and home life, so you have to take care that you don't ignore the important aspects of that house for the sake of your home and family.

*But I don't see Cancer on any house cusps!*

Some of you may have Cancer contained within a house, called intercepted. This occurs when you have Gemini on one cusp, and Leo on the next cusp, so Cancer is completely within the Gemini house. Interpret for the Gemini house, but know that when a sign is contained within a house like this, it's difficult to access the energy of the sign. It's being gobbled up by the house, so you may be someone who feels that the parts of life associated with the house Cancer is in are more important than creating your perfect home or home life.

## **BONUS: TIMING**

If you want to know WHEN you can work on your home and family life, you have a few options. You can use simple mundane astrology and follow when the planets are touring the sign of Cancer. The Moon tours Cancer for 2-3 days every month, so that gives constant opportunities. The Sun, Mercury, and Venus tour Cancer for 3-4 weeks every year.

On a personal level, you can look at when the transit planets are touring your natal 4th house, or when the transit planets are aspecting your natal Moon, natal 4th house ruler, or natal 4th house cusp. You'll focus on conjunctions, sextiles, and trines since they are beneficial; technically, you also can under squares and oppositions, you just have to be ready for any challenges, be willing to adjust on the fly, and handle potential lessons that need to be learned on the way.

***If this is over your head You must be brand new to predictive astrology!  
In which case, you'll want to check out the beginner predictive  
astrology course, [Get Started With Predictive Astrology](#) :)***

## WORKSHEET

- **List all of your positions and write down some notes for each position.**

4th house sign:

4th house planets:

4th house ruler and house location of the ruler:

Moon sign:

Moon house location:

Aspects my Moon makes:

Cancer house:

**Answer the questions below.**

What does "home" mean for you?

How can you make changes now to start creating your perfect home and home life?

What does your chart say you need for your home and home life?

**Make a list of everything your chart says you need. Go through it and see what you already have and what you don't. Pick what you don't have that you want to have, and focus on creating that.**
