NOTES

ABOUT DECEMBER 2024:

Mercury is retrograde as December begins, and Mars retrograde starts on December 6th in Leo, so we're feeling a bit off. There can be lots of reflection and considering the past, and many little things to tackle. This is fantastic energy for a second chance though, especially with the Sagittarius New Moon to start the month.

Neptune direct means the fog begins to lift, and both Venus and Ceres entering Aquarius on the same day brings nurturing energy to our dreams for the future. We can make changes that get us closer to where we want to be.

Mercury retrograde coming to an end on December 15th helps us regain mental focus, but with Mars still retrograde for the rest of the year, we're likely not fully done with reflecting and introspection. The Gemini Full Moon makes us more passionate about our ideas and expressive.

The Sun entering Capricorn on the 21st urges us to get focused on our goals and life direction. The Capricorn New Moon to close the year gives energy and enthusiasm to get started.

Changes can occur in our relationships to kick the week off, and these changes can improve our connections and make us feel closer. We can be extra lazy and indulgent midweek, and want to take it easy, if we can. Imagination can be strong, and we can get lost in that, which can take away mental discipline. Try to go easy on yourself and others. The future becomes more important over the weekend, and we can tend to our relationships, though we may feel a bit lazy and prone to excess. We can empower ourselves to end the week, and with the 2nd Quarter Moon Phase in Pisces, we can spend the next week making adjustments intuitively, subconsciously, and quietly on our own.

Make a plan for the week! Which relationships can you focus on making changes with, how can you go easier on yourself and others, how can you empower yourself, and what can you adjust:

Week of: December 9th – 15th 2024

Planetary Events:

Thursday: Venus opposite Mars

Friday: Mercury retrograde sextile
Venus

Sunday: Mercury Direct in
Sagittarius, Gemini Full Moon

Passion can be high later in the week, and we can focus on connecting. We can find new ways of expressing ourselves, and enjoy mental stimulation. The Gemini Full Moon helps us sort through ideas, finalize plans, and say what we really mean. The week ends with Mercury retrograde coming to a close, and our minds can start getting focus back.

Make a plan for the week! How can you use your mind, which ideas can you focus on and plans can you finish, and how can you tend to your mental needs:

Week of: December 16th – 22nd 2024

Planetary Events:

Wednesday: Sun square Neptune

Thursday: Venus trine Jupiter

Friday: Mars retrograde opposite
Ceres

Saturday: Sun Enters Capricorn

Sunday: 4th Quarter Moon Phase
in Libra

We can be intuitive and imaginative midweek, which makes us feel good, but we may have a hard time focusing on anything that requires work, so we may take it easy. We can try to improve access to resources and give ourselves more support later in the week, but we may lash out if we don't feel we have enough, so we need to work on that. The Sun entering Capricorn helps with some discipline and crafting long-term plans. The 4th Quarter Moon in Libra to end the week pushes us to clear out relationship issues over the next week and finalize compromises.

Make a plan for the week! How can you make use of imagination and intuition, which resources can you improve, what can you be more disciplined with, and what can you clear out:

Week of: December 23rd – 29th 2024

Planetary Events:

Tuesday: Jupiter square Saturn

Thursday: Mercury opposite

Jupiter

Friday: Mercury square Saturn

Saturday: Venus square Uranus

Jupiter square Saturn can make it very difficult to balance expansion with discipline, and we may feel extra limited, or we're prone to excess. We need some middle ground there, but our focus is likely lacking, and we don't want to deal with anything serious this week. We can push for change over the weekend, but may not see it through just yet. This is a challenging week, but one where we need to not push so hard and try to open our minds.

Make a plan for the week! How can you better balance expansion with discipline, work on plans for change, and open your mind to possibilities:

Week of: December 30th 2024 – January 5th 2025

Planetary Events:

Monday: Capricorn New Moon

Thursday: Venus Enters Pisces

Friday: Mars retrograde opposite
Pluto

Saturday: Sun sextile Saturn

2024 ends with a Capricorn New Moon, so we try to drill down on our goals for the new year and work on our plans. Venus enters Pisces in the new year, and we can be more compassionate and understanding with others, and feel extra creative. Mars opposing Pluto can create challenges with power struggles and control issues, and we likely need healthy outlets, especially physical ones, for the extra energy so we don't snap. Sun sextile Saturn at least brings better self-discipline and self-control.

Make a plan for the week! Which goals can you become clear with, how can you manage frustrations in a healthy way, and how can you improve discipline:

MARS RETROGRADE IN LEO & CANCER

DATES:

- Starts December 6th 2024 @ 6 degrees Leo
- Enters Cancer January 6th 2025
- Ends February 23rd 2025 @ 17 degrees Cancer
- Shadow period: October 5th 2024 - May 2nd 2025
- Extra: Anaretic in Cancer January 6th - 8th 2025

DETAILS:

2024 comes to an end with Mars retrograde, first starting in Leo for one month before moving to Cancer for the rest of the retrograde. Mercury is retrograde for the first 9 days as well, so this is a big time for looking back and reflecting on the year that's come to pass, and considering what we'd like a second chance with.

With Mars retrograde starting in Leo, this can bring issues in our love relationships, with our hobbies, and with our hearts. We may want more time for play but can't get it, and we can lash out because of this. We may have little patience for anything serious, but this can get us in trouble. It's important to balance work and play, serious and fun.

With Mars retrograde in Cancer, this amplifies emotions, and we can be motivated to take action based on what we feel. The problem is we may not think this through logically, and we may be subjective and not see the whole picture. We need to make sure we take a step back and see what's fully there, and have the information we need. This can be extremely important when Mars is anaretic in Cancer. This can also bring attention to home and family matters, and we may want to reconnect and stay within our comfort zones.

NEW MOON & MERCURY DIRECT IN SAGITTARIUS

MINI SCOPES

ARIES The New Moon can push you to focus on having new experiences, to expand your life in new ways, and to explore new places, though this might wait until the Mercury direct before you actually have the opportunity for any of this. Work on your plans in the meantime.

TAURUS The New Moon can help you get to the heart of something, find a solution, and work on a transformation for the better, and this can help you come out of the Mercury retrograde in a better position. You can feel empowered, and this can give you control over something that has been chaotic.

GEMINI The New Moon can help you connect with others, and you can be open to meeting new people or entering into commitments and compromises. This may not be seen through fully until the Mercury direct though, but you can come out of the retrograde feeling better with others.

CANCER The New Moon can help you get organized, find ways to be more productive, and focus on work projects and plans that excite you. You can take a different approach to this thanks to Mercury retrograde, or pick back up an old approach or project. You can get things done with the Mercury direct.

LEO The New Moon can inspire you, and you can focus on picking up a creative project that you're excited about. This could be a project from the past, and you can make progress with it now. You may have a better view of it with the Mercury direct, and work on being more productive.

VIRGO The New Moon can make you feel more connected to your inner foundation, and you can work on something from the ground up. This might be an old project you pick back up, or it might be something existing whose foundation you strengthen. You can feel more confident with the Mercury direct.

You can make progress with the Mercury direct.

CAPRICORN The New Moon wants you to pursue projects and ideas behind the scenes, and you can give yourself the time you need to recharge as you work that way. The Mercury retrograde may be draining, so time for rest is important. You can feel you make more headway once Mercury is direct.

AQUARIUS The New Moon focuses on your dreams for the future, and you can pick back up an old dream, or work on changes that need to be made. You can be more independent with the Mercury retrograde, and want to do things differently. You can feel more in control with the Mercury direct.

You can make more progress with the Mercury direct, and can set yourself up with the New Moon to be on the right path coming out of Mercury retrograde.

MARS RETROGRADE IN LEO

Mini SCOPES

ARIES Mars is your ruler, so you can feel off in a subtle way throughout Mars retrograde and need to give yourself space. With the retrograde starting in Leo, you may struggle with having time to connect to your heart, to enjoy yourself, and may have little patience for anything that feels like work. Try to plan for breaks, and spend time picking back up an old hobby or reconnecting with an old flame.

TAURUS Mars retrograde in Leo can make you extra emotional, and this can stir up lots of frustration, aggravation, and irritation. You need to spend more time taking care of your emotional needs and giving yourself emotional support, otherwise you can lash out. You likely need to stay within your comfort zone, and work on strengthening your inner core.

GEMINI Mars retrograde in Leo can make you extra argumentative, quick to fight with words, and you likely have to work on biting your tongue, otherwise you say things you regret later. If you're frustrated, try to get to the heart of why. Work on finding new ways to express yourself, and try to improve your communication skills.

CANCER Mars retrograde in Leo can make you feel extra stuck, and this can cause a lot of frustration and annoyance. This makes you lash out, and when you fight, you may not want to back down. This only causes more problems though, so try to avoid fighting and instead work on getting to the source of why you're stuck. If you can figure out why, you can work on getting unstuck.

LEO Mars retrograde starts in your sign, and this means you can be extra short, easily angered, and super frustrated. It may seem like the Universe is targeting you at times with all of the little things that pop up. Try to take a step back and leave room in your plans and schedule for breaks. Go easy on yourself, and don't rush to fight. Focus on taking a second chance with something instead.

VIRGO Mars retrograde in Leo can zap your energy, and you may feel drained constantly. You'll need to give yourself lots of time for extra rest, otherwise you may be rundown all the time. Old issues from the past, subconscious issues, and karmic issues can also be more prominent, and you can work on understanding and releasing them now.

MARS RETROGRADE IN LEO

Mini SCOPES

LIBRA Mars retrograde in Leo can make you extra rebellious, and if there is even a hint of you being held back, you can lash out in a big way. This is usually a matter of perception though, rather than you actually being held back. Try to give yourself room to be as independent as you can, and push yourself outside our comfort zone. Work on beneficial changes, and get excited by your future.

SCORPIO Mars retrograde in Leo can make you feel like you're experiencing one setback after another, and your hard work might not be paying off at the moment. There may be a delay for a reason, so try to focus on what's come to pass to see if you've missed anything or need to change something. This can be a good time to work on an old goal again, or reconnect with an old boss.

SAGITTARIUS Mars retrograde in Leo can make you crave extra space and freedom to do your own thing, and if you don't feel you have that, you can run. This only creates more problems though, so resist the urge to run, and instead try to work with what you have. This can be a good time to pick back up an old course of study, or to reconnect with a mentor.

CAPRICORN Mars retrograde in Leo can bring out some deeply-held issues, and you'd rather keep shoving them down, but that likely isn't an option anymore. Face it, work through it, and this can empower you, strengthen you, and give you more control in your life. Transform and rise, and you can emerge from this retrograde in a powerful position.

AQUARIUS Mars retrograde in Leo can make your dealings with others more challenging, and you may get into a lot of fights with others, though it might be them starting it and you just get dragged into it. Try to avoid the drama as best as you can, and work on relationship issues. Focus on giving time to the healthy relationships you have, and getting distance from those you don't. You may want to reconnect with someone from the past too.

PISCES Mars retrograde in Leo can bring tons of little things to you, and you can attempt to tackle all of it, but this likely leads to a breakdown if you go too far. It can be good for you to be productive, but you need to make sure you're taking breaks. That isn't weakness, it's recharging you. If you don't give yourself breaks, stress can mount, so take the breaks.
